Final Prompt used:

Create a one-page professional resume using the following details:
Name: Pajarito, Avijun E.
Email: avijuncsgo123@gmail.com
Phone: 09156100679
Education: AdDU Aerospace Engineering
Skills: Beatboxing, cooking, and Driving
Projects/Experience: Cloud seeding

Use a Modern style resume where everyone would think it was made by a professional who has a salary of 100,000$.

Output of Gemini (Fast Version)

AVIJUN E. PAJARITO

Aerospace Engineer Davao City, Philippines | 09156100679

avijuncsgo123@gmail.com | [LinkedIn Profile]

PROFESSIONAL SUMMARY

High-caliber **Aerospace Engineering** professional with specialized experience in atmospheric modification and advanced technical operations. Proven track record in executing high-stakes projects, including **Cloud Seeding** initiatives, requiring precision, logistical expertise, and mastery of aerospace dynamics. Combines technical engineering rigor with a diverse set of practical skills to deliver excellence in complex, fast-paced environments.

CORE COMPETENCIES

- **Engineering:** Flight Mechanics, Atmospheric Science, Aircraft Systems, Cloud Seeding Operations.
- **Operational:** Precision Driving, Logistics Management, Safety Protocols, Advanced Navigation.
- **Interpersonal:** High-Pressure Communication, Team Leadership, Adaptability, Public Speaking (Vocal Performance).

PROFESSIONAL EXPERIENCE

Lead Technician / Specialist | Cloud Seeding Project

- Executed complex atmospheric modification missions to mitigate drought conditions and manage water resources.
- Collaborated with meteorological teams to identify optimal flight paths and chemical dispersal windows.
- Monitored real-time data to ensure maximum efficiency in precipitation enhancement.
- Maintained strict adherence to aviation safety standards and environmental regulations.

EDUCATION

Bachelor of Science in Aerospace Engineering *Ateneo de Davao University (AdDU)* *
Relevant Coursework: Aerodynamics, Propulsion Systems, Thermodynamics, and Orbital Mechanics.

TECHNICAL SKILLS & CERTIFICATIONS

- **Advanced Navigation & Transit:** Expert-level driving capabilities with a focus on precision, safety, and logistical efficiency.
- **Atmospheric Modification:** Specialized knowledge in the deployment and physics of cloud seeding agents.
- **Culinary Arts:** Advanced proficiency in high-end cooking and nutritional management—essential for team morale and operational self-sufficiency.
- **Vocal Acoustics (Beatboxing):** Professional-grade vocal percussion skills, demonstrating high levels of rhythm, discipline, and creative performance.

PROJECTS & ACHIEVEMENTS

- **Aerospace Design Synthesis:** Developed conceptual models for high-efficiency flight modules during tenure at AdDU.
- **Resource Management:** Successfully led small-team logistics for localized engineering projects, consistently meeting deadlines under budget.
- **Performance Art:** Recognized for unique vocal talents, bridging the gap between technical engineering and creative expression.

AVIJUN E. PAJARITO

Philippines • 09156100679 • avijuncsgo123@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and highly adaptable Aerospace Engineering student with a strong foundation in technical problem-solving and hands-on project execution. Demonstrates discipline, creativity, and precision through both academic and real-world applications. Capable of working in dynamic environments, with a unique blend of analytical thinking and practical skills.

EDUCATION

Ateneo de Davao University (AdDU)
Bachelor of Science in Aerospace Engineering
(Expected Graduation: —)

PROJECTS & EXPERIENCE

Cloud Seeding Project

- Participated in atmospheric modification initiatives aimed at enhancing rainfall.
- Assisted in planning and execution processes, ensuring adherence to safety and operational protocols.
- Gained exposure to meteorological concepts and aerospace-related applications in environmental systems.

SKILLS

- **Technical & Practical:** Driving, Basic Engineering Applications
- **Creative & Personal:** Beatboxing, Cooking
- **Soft Skills:** Adaptability, Discipline, Problem-Solving, Time Management

ADDITIONAL INFORMATION

- Quick learner with the ability to adapt to new technologies and environments
- Strong work ethic with a focus on precision and continuous improvement

REFERENCES

Available upon request

Criteria	Gemini (Fast Version)	ChatGPT (Free Version)
Structure	10/10	5/10
Clarity	9/10	4/10
Formatting	10/10	8/10
Overall Quality	10/10	3/10
	39/40	20/40

Reflection:

- Which LLM performed better and why?
  Gemini outperformed chatgpt by a mile, and that was the fast version, there is still a pro version for gemini. I mean the version I used on chatgpt is free, but so is gemini and you could send unlimited pictures on gemini and there would be no problem but chatgpt only is limited to 2 or 3. Unless you pay for pro version chatgpt is redundant
- What differences did you observe?
  Gemini included languages which are really innovative for an AI and predicted I could use english and tagalog, but cebuano is wrong, it probably thought bisaya and cebuano were the same but nonetheless it was great. ChatGPT on the other hand did really badly considering the fact that it was the first AI that was used back in the days. There was a

new feature though where you can edit what the AI says, meaning you can edit it's imperfection which speaks a lot on it's improvements.

- What improvements did you make in your final resume?
  Only the Cebuano part I changed it into Bisaya, that's it the resume was near perfect already, but it's an obvious AI resume which I can humanize but this is the point of this assignment.
- What did you learn about prompting?
  You have to be specific and at least be understandable enough to make it do what you are expecting it to do. Like Create an image of a "man", "wearing an armor", "has a perfect ratio face", etc.
